Look through the pages and become acquainted with the various pieces. Read the instructions and study the illustrations to know what/where to cut/fold. Before gluing, always dry-fit the pieces to ensure that they fit. If they don't fit, you may have the wrong pieces.

When assembling the model and following the instructions, do not take the illustrations too literally. In many cases, pieces will be simplified. Other times, pieces (or entire sections) may be missing that were once displayed. This does not mean you should disassemble your model—ever.

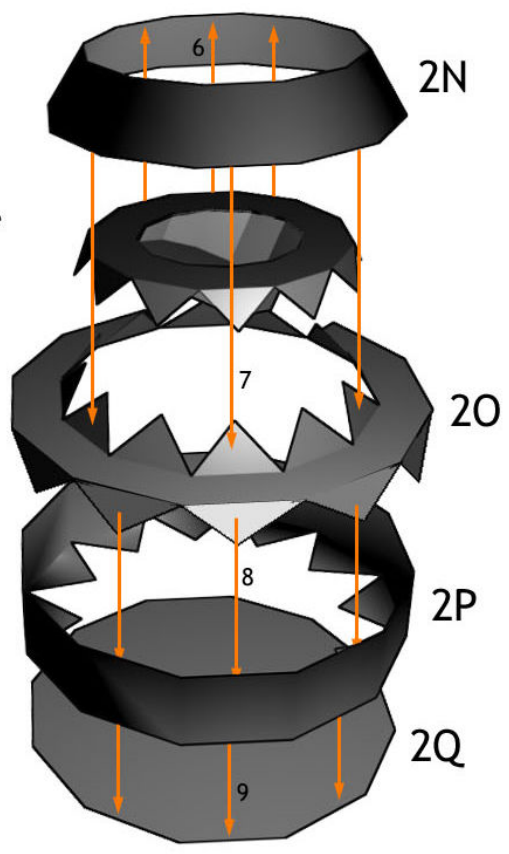

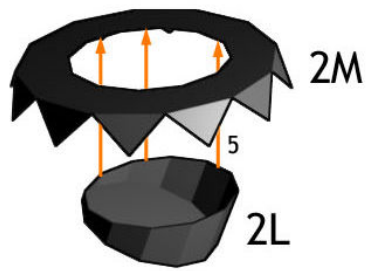

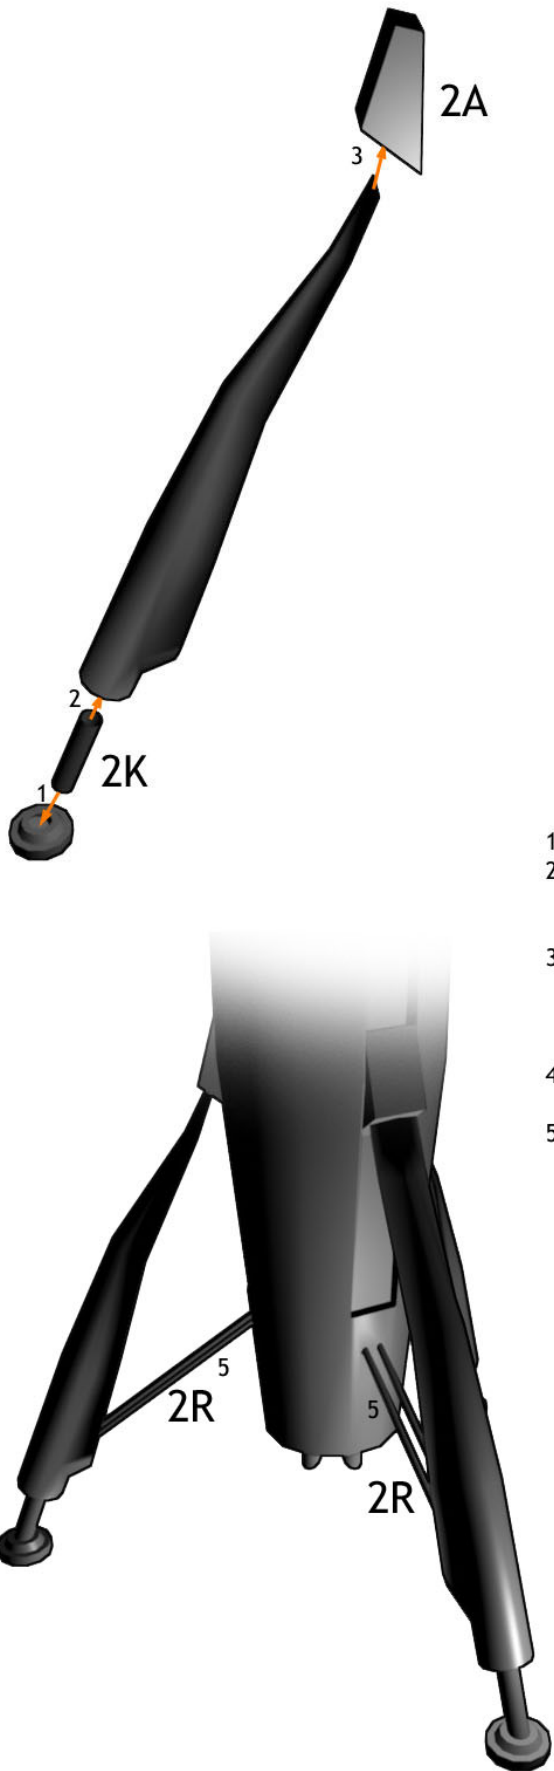

1. Glue piece 1N (tabs pointing downward) to the inside of piece 1C. Be sure to glue it just beneath the tabs of piece 1C. Glue piece 1A to piece 1B, and piece 1B to piece 1C.
2. Cut out the six small ovals on piece 1E first. Glue piece 1F to the inside of piece 1E, then glue pieces 1K to the inside of piece 1E.
3. Glue piece 1L (tabs pointing downward) to the inside of the lower body assembly.
4. Glue piece 1D to the lower body assembly.
5. Glue piece 1M (tabs pointing downward) to the inside of piece 1D.
6. Glue the upper body assembly to the lower body assembly, then glue piece 1J to the body.
7. Assemble pieces 1G & 1H and glue to the underside of the body assembly as shown. Make sure that the longest side of pieces 1G faces outward.

1. Glue piece 2E to itself to form a short tube, then glue pieces 2B-E together as shown.
2. Glue piece 2G to the center of piece 2F. With the cone tapering upward, glue piece 2F to the bottom of piece 2E.
3. Glue the strut assembly to piece 2H.
4. Cut out the small ovals on piece 2J, then glue to piece 2H.
5. Assemble piece 2L as shown, then glue to the inner edge of piece 2M.
6. Glue the upper foot assembly to the inner edge of piece 2N.
7. Glue piece 2N to the inner tabs of piece 2O.
8. Glue piece 2O to the inside of piece 2P.
9. Glue the foot assembly to piece 2Q.

1. Glue piece 2K into the foot assembly.
2. With the foot & strut assemblies at the same angle, glue the leg of the foot assembly to the bottom of the strut assembly. Let it dry completely!
3. Glue the strut assembly to piece 2A. The surface area is very small, so be sure to let the glue COMPLETELY DRY. In a couple of steps, you will have to bend the strut assemblies, so it is important to have a strong bond.
4. Glue the strut assemblies to the body assembly. DO NOT attempt to stand the model upright; let it dry completely!
5. Insert & glue pieces 2R into the holes in the body assembly. Be sure to insert and angle them, matching the dotted line. Let these parts partially dry; you want them to be sturdy enough so that they do not slip out, but flexible enough to bend. Insert & glue the opposite ends of pieces 2R into the holes in the strut assemblies. Be sure to insert and angle them, matching the dotted line. DO NOT attempt to stand the model upright! Let the glue completely dry.

Congratulations!

You've completed the model.
